Canopia |Rubicon 6ft Ultra Durable Outdoor Storage Shed for Garden Dark Grey Series

Highly durable storage for multi-functionality and years of superior protection

The Rubicon Shed is the ideal choice for storing, organizing, and protecting your outdoor life. Made with Canopia's virtually unbreakable polycarbonate panels and reinforced aluminum frame, the Rubicon Shed is a standout for its robustness and durability. It requires little to no maintenance, ensuring years of protection.

It is equipped with unique polycarbonate skylight roof panels that transmit natural sunlight throughout the day while maintaining an opaque exterior for maximum privacy. Canopia Rubicon sheds do not fracture, bend, or discolor, withstanding harsh weather conditions such as hail and high temperatures.

Designed with your outdoor space in mind, the Rubicon Shed will complement your home and enhance your outdoor living space.

Multiwall Panels: The 10mm multiwall fortified polycarbonate panels enhance shed insulation, do not bow, or sag in extreme heat or break in extreme cold. The panels maintain their integrity over time, resisting humidity, fungal decay, and termites.

Aluminum Frame: The highly durable, maintenance free frame provides added strength, stability, and resistance to the elements. The frame is strong enough to hold the weight of added shelves, racks, and hangers, all available for purchase separately.

Year-Round Weather Resistance: Withstands **winds** up to 65 mph & **snow load** up to 18-22.5 lbs./sq².

Sunlit Skylight Roof: Shingles-like roof panels transmit 10% sunlight while staying opaque from the outside for privacy.

Floor and Anchor Kit Included: Includes an anti-slip floor to keep you and your things protected and increase stability and weather resistance with anchor kit. Can be anchored onto most solid surfaces including wood, concrete, and metal.

Metal Hinges: The door hinges are made of metal for durability over years of use.

Accessible and Secure: Low threshold ramp and lockable wide door provides easy access (padlock not included).

DIY Assembly: Sliding panel system includes pre-drilled profiles, pre-cut sliding panels and all hardware. Please ensure you have sufficient side space for inserting the roof panels during assembly. Anchor shed to a solid surface using suitable screws and plugs (not included).

Warranty: 12-Year Limited Warranty and local customer support.
